

Shaping the future of heritage in Canberra

Capability Statement

Approachable, experienced team with deep knowledge about the ACT and beyond.

GML Heritage Canberra is a multidisciplinary team of heritage consultants, led by Director and Principal Rachel Jackson. Since the Canberra office opened in 2006, the team has delivered hundreds of heritage projects for National, Commonwealth and local heritage places in the ACT and its regions.

Delivering an integrated heritage management approach, the team offers a wide range of services including First Nations heritage, built and landscape heritage, archaeology and heritage resilience. They listen deeply and understand how to assess and manage places for their heritage value at all levels and complexities across many jurisdictions in Australia.

The Canberra team is highly regarded for their expertise in providing heritage services for Commonwealth agencies and their contractors. Clients include the Department of Defence, Australian War Memorial, National Capital Authority, Australian National University, Old Parliament House, Department of Finance, Department of Infrastructure and ACT Government directorates.

With a client-focused and professional approach, the Canberra team stays up to date through industry engagement, ongoing teaching, learning and research.

Services

The Canberra team specialises in the following areas:

Built Heritage

Our people deliver urban and built heritage advice, assessments, plans and reviews. We balance conservation with development, alongside contemporary design and today's requirements, to support quality decision-making that is clear, credible and consistent.

First Nations Heritage

We work with Traditional Owner organisations and other First Nations people to understand cultural values and develop cultural heritage management plans and interpretation plans, which respect First Peoples' cultural heritage and align with legislative requirements.

History

Our professional historians bring new perspectives to places through evidence-based research and analysis that reckons with our past.

Heritage Resilience

We assess a place's heritage values, identify a wide range of risks, and develop policies and guidelines to manage places for a sustainable future.

Archaeology

Our experienced archaeologists offer comprehensive archaeology services including site assessments, permit applications, approvals, excavations and reporting.

Landscape Heritage

We provide insights into how and why landscapes have been modified through time. We help clients to understand, manage, revitalise and conserve cultural landscapes, parks and gardens.

Interpretation and Design

Our heritage experts and designers work together to imaginatively tell the stories of historic places and landscapes.

Local to Global Heritage

We are trusted to understand and apply various listing criteria and recognise community values and perceptions in relation to heritage management practice.

It is a pleasure to work with GML. They are passionate and knowledgeable about Canberra, deliver clear and thoroughly researched work and reliably meet deadlines.
